LEVISTICK

A Home of Poi levistick can create magic, grace, style and illusion to any performance routine.

Also known as a magician's floating stick or levitating wand. Wave your hands around and amaze onlookers as the stick appears to defy gravity.

- Weighted fibreglass rod for easier control and improved outside use.
- Fantastic holographic decoration adds to the illusion.
- Quickly wow your friends with this simple to use levistick.

This is a weighted stick with a very thin 'hard to see' cord attached. Hold onto the other end of the cord. Wave your hands and your movement creates the illusion.

The idea is to make the hand that is not holding the cord appear as if it is holding a cord above the stick. And the hand holding the cord moves as if it is not connected to the stick.

We have free online video lessons on our website
